An introduction to the DePuy Spine™ Special Request Team

“Our prime objective is to respond to the specific requirements of the customer. This could mean just a simple instrument modification or a bespoke custom implant for a complex case.

DePuy Spine™ has probably the most comprehensive product range in the Spinal business today. SRT compliments this by addressing the issues that may fall outside the standard product portfolio.”

Our Special Request team of Design engineers within DePuy Spine™ and Biedermann Motech oversee each project from initial enquiry through to delivery of the finished product.

“It has proven to be an extremely valuable new instrument.”

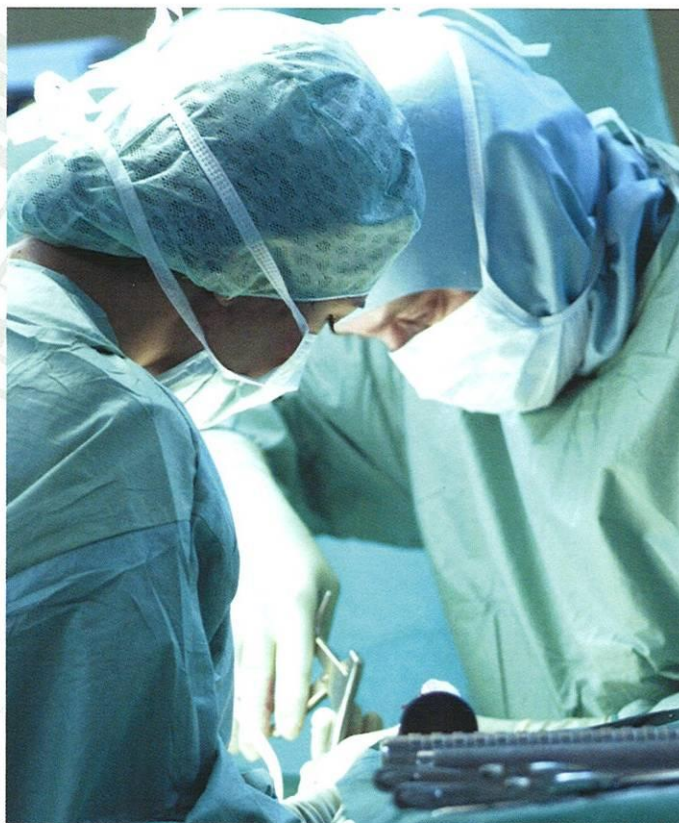

“The new instrument is exactly what I need to make the system we use even more effective. It has proven to be an extremely valuable development. The service allowed me to adapt the instrumentation to my preferred surgical technique rather than the other way round.”

Dr W. L. de Klerk, MD PhD
University Hospital Rotterdam, The Netherlands

“The company achieved the implant my patient needed.”

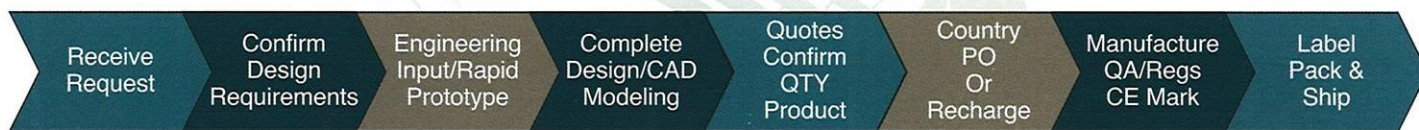

“This is a great service for any spinal surgeon. The implant we designed together is exactly what I need for my patients.”

Dr J. M. Casamitjana Ferrándiz
Barcelona, Spain
